

# 1 Intro

Hi. I am Panteleimon Sarantos (You can call me Pantelis) and I made this list of commands for the Cisco Routers and Switches.

| 5.1.1 Management Security.....                                          | 3 |
| 5.1.1.1 Enable CLI Password.....                                        | 3 |
| 5.1.1.2 Enable Password after enable – EXEC – Global Configuration..... | 3 |
| 5.1.1.3 Enable Telnet Password.....                                     | 3 |
| 5.1.1.4 SSH.....                                                        | 4 |
| 5.1.1.4.1 SSH Configuration.....                                        | 4 |
| 5.1.1.4.2 More SSH Settings.....                                        | 4 |
| 5.1.2 Access Lists Security.....                                        | 4 |
| 5.1.2.1 Standard ACLs.....                                              | 4 |
| 5.1.2.1.1 Numbered Standard ACLs.....                                   | 4 |
| 5.1.2.1.2 Named Standard ACLs.....                                      | 4 |
| 5.1.2.1.3 Modify Named ACLs.....                                        | 5 |
| 5.1.2.2 Extended ACLs.....                                              | 5 |
| 5.1.2.2.1 Numbered Extended ACLs.....                                   | 5 |
| 5.1.2.2.2 Named Extended ACLs.....                                      | 5 |

|             |                                                                        |    |
|-------------|------------------------------------------------------------------------|----|
| 5.1.2.2.3   | Modify Numbered Extended ACLs.....                                     | 5  |
| 5.1.2.2.4   | Modify Named Extended ACLs.....                                        | 6  |
| 5.1.2.3     | Access Lists Info.....                                                 | 6  |
| 5.1.2.3.1   | More SSH Settings.....                                                 | 6  |
| 5.2         | IP.....                                                                | 6  |
| 5.2.1       | Assign IP to Interface.....                                            | 6  |
| 5.2.1.1     | IPv4.....                                                              | 6  |
| 5.2.1.2     | IPv6.....                                                              | 6  |
| 5.3         | Routing.....                                                           | 6  |
| 5.3.1       | OSPF.....                                                              | 6  |
| 5.3.2       | EIGRP.....                                                             | 7  |
| 5.3.3       | RIPv2.....                                                             | 7  |
| 5.4         | InterVLAN Routing.....                                                 | 7  |
| 5.5         | DHCP.....                                                              | 7  |
| 5.6         | NAT.....                                                               | 8  |
| 5.6.1       | Static NAT.....                                                        | 8  |
| 5.6.1.1     | Configuration.....                                                     | 8  |
| 5.6.1.2     | Assign NAT to Interfaces.....                                          | 8  |
| 5.6.2       | Dynamic NAT.....                                                       | 8  |
| 5.6.2.1     | Configuration.....                                                     | 8  |
| 5.6.3       | PAT.....                                                               | 8  |
| 5.6.4       | General.....                                                           | 8  |
| 5.6.4.1     | Verify Configuration.....                                              | 8  |
| 5.6.4.2     | Clear Static NAT.....                                                  | 8  |
| 5.6.4.3     | Clear Dynamic NAT.....                                                 | 9  |
| 5.6.4.4     | Remove the public NAT pool.....                                        | 9  |
| 5.6.4.5     | Remove the NAT translation from inside source list to outside pool.... | 9  |
| 5.7         | General Settings.....                                                  | 9  |
| 5.7.1       | Date and Time Settings.....                                            | 9  |
| 5.7.2       | Prevent unwanted DNS Lookups.....                                      | 9  |
| 6           | Switch.....                                                            | 9  |
| 6.1         | Security.....                                                          | 9  |
| 6.1.1       | Management Security.....                                               | 9  |
| 6.1.1.1     | Enable CLI Password.....                                               | 9  |
| 6.1.1.2     | Enable Encrypted Password after enable – EXEC – Global Configuration   | 10 |
| 6.1.1.3     | Enable Telnet Password.....                                            | 10 |
| 6.1.1.3.1   | SSH.....                                                               | 10 |
| 6.1.1.3.1.1 | SSH Configuration.....                                                 | 10 |
| 6.1.1.3.1.2 | More SSH Settings.....                                                 | 10 |
| 6.1.2       | Port Security.....                                                     | 10 |
| 6.1.2.1     | Close unused physical ports.....                                       | 10 |
| 6.1.2.2     | Configure Basic Port Security.....                                     | 11 |
| 6.2         | VLAN.....                                                              | 11 |

|                                                  |    |
|--------------------------------------------------|----|
| 6.2.1 Create a VLAN.....                         | 11 |
| 6.2.2 Assign Physical Access Ports to VLAN.....  | 11 |
| 6.2.3 Set Physical Ports to Trunk.....           | 11 |
| 6.2.4 Set Physical Ports to Native Trunking..... | 11 |
| 6.2.5 Assign IP to VLAN.....                     | 11 |
| 6.2.6 Verify VLAN.....                           | 12 |
| 6.3 IP.....                                      | 12 |
| 6.3.1 Prevent unwanted DNS Lookups.....          | 12 |
| 6.3.2 Default Gateway.....                       | 12 |
| 6.4 General Settings.....                        | 12 |
| 6.4.1 Date and Time Settings.....                | 12 |
| 6.4.2 Log In Banner Message.....                 | 12 |

## 4 Save Progress

To save the following commands to the startup-config run:

```
en
conf t
wr
```

```
#or
do wr
```

## 5 Router

### 5.1 Security

#### 5.1.1 Management Security

##### 5.1.1.1 Enable CLI Password

```
en
conf t
line con 0
password compass
```

##### 5.1.1.2 Enable Password after enable – EXEC – Global Configuration

```
en
conf t
enable secret password
```

##### 5.1.1.3 Enable Telnet Password

```
en
conf t
line vty 0 15
```

```
password telnetpass
login
```

#### **5.1.1.4 SSH**

##### **5.1.1.4.1 SSH Configuration**

```
en
conf t
ip domain-name isp.gr
username admin privilege 15 secret sshpass
line vty 0 15
transport input ssh
login local
exit
crypto key generate rsa
end
show ip ssh
```

##### **5.1.1.4.2 More SSH Settings**

```
en
conf t
ip ssh time-out 75
ip ssh authentication-retries 2
```

#### **5.1.2 Access Lists Security**

##### **5.1.2.1 Standard ACLs**

###### **5.1.2.1.1 Numbered Standard ACLs**

```
en
conf t
access-list 1 remark Allow R1 LANs Access
access-list 1 permit 192.168.10.0 0.0.0.255
access-list 1 permit 192.168.20.0 0.0.0.255
access-list 1 deny any
```

```
en
conf t
interface g0/1
ip access-group 1 out
```

###### **5.1.2.1.2 Named Standard ACLs**

```
en
conf t
ip access-list standard BRANCH-OFFICE-POLICY
permit host 192.168.30.3
```

```
permit 192.168.40.0 0.0.0.255
end
```

```
en
conf t
int g0/1
ip access-group BRANCH-OFFICE-POLICY out
```

#### **5.1.2.1.3 Modify Named ACLs**

```
en
conf t
ip access-list standard BRANCH-OFFICE-POLICY
30 permit 209.165.200.224 0.0.0.31
40 deny any
end
```

#### **5.1.2.2 Extended ACLs**

##### **5.1.2.2.1 Numbered Extended ACLs**

```
en
conf t
access-list 100 remark Allow Web & SSH Access
access-list 100 permit tcp host 192.168.10.3 host 10.2.2.1 eq 22
access-list 100 permit tcp any any eq 80
```

```
en
conf t
interface g0/1
ip access-group 100 out
```

##### **5.1.2.2.2 Named Extended ACLs**

```
en
conf t
ip access-list extended WEB-POLICY
permit tcp 192.168.30.0 0.0.0.255 host 10.1.1.1 eq 80
permit tcp 192.168.30.0 0.0.0.255 209.165.200.224 0.0.0.31 eq 80
```

```
en
conf t
interface S0/0/1
ip access-group WEB-POLICY out
```

##### **5.1.2.2.3 Modify Numbered Extended ACLs**

```
en
conf t
ip access-list extended 100
```

```
30 permit ip 192.168.10.0 0.0.0.255 192.168.30.0 0.0.0.255
end
```

#### **5.1.2.2.4 Modify Named Extended ACLs**

```
en
conf t
ip access-list extended WEB-POLICY
30 permit ip 192.168.30.0 0.0.0.255 192.168.10.0 0.0.0.255
end
```

#### **5.1.2.3 Access Lists Info**

```
en
show access-lists
```

#### **5.1.2.3.1 More SSH Settings**

```
en
conf t
ip ssh time-out 75
ip ssh authentication-retries 2
```

## **5.2 IP**

### **5.2.1 Assign IP to Interface**

#### **5.2.1.1 IPv4**

```
En
conf t
int g0/0
ip add 192.168.1.1 255.255.255.0
no shut
```

#### **5.2.1.2 IPv6**

```
en
conf t
ipv6 unicast-routing
int g0/0
ipv6 add 2001:db8:1:1::1/64
ipv6 add fe80::1 link-local
no shut
```

## **5.3 Routing**

### **5.3.1 OSPF**

```
en
conf t
```

```
router ospf 1
network 192.168.1.0 0.0.0.255 area 0
network 10.0.0.0 0.0.0.3 area 0
network 10.1.1.0 0.0.0.3 area 0
```

### 5.3.2 EIGRP

```
en
conf t
router eigrp 1
network 200.200.200.0 0.0.0.3
network 100.100.100.0 0.0.0.255
auto-summary
```

### 5.3.3 RIPv2

```
en
conf t
router rip
version 2
network 192.168.10.0
network 192.168.20.0
network 192.168.30.0
no auto-summary
```

## 5.4 InterVLAN Routing

```
interface g0/1.1
encapsulation dot1Q 1
ip add 192.168.1.1 255.255.255.0
interface g0/1.10
encapsulation dot1Q 10
ip add 192.168.10.1 255.255.255.0
interface g0/1.20
encapsulation dot1Q 20
ip add 192.168.20.1 255.255.255.0
exit
interface g0/1
no shut
```

## 5.5 DHCP

```
en
conf t
ip dhcp excluded-address 100.100.100.1
ip dhcp pool KATOSTARI
```

```
network 100.100.100.0 255.255.255.0
default-router 100.100.100.1
```

## 5.6 NAT

### 5.6.1 Static NAT

#### 5.6.1.1 Configuration

```
en
conf t
ip nat inside source static <Private Address> <Public Address>
ip nat inside source static 192.168.1.20 209.169.200.225
```

#### 5.6.1.2 Assign NAT to Interfaces

```
en
conf t
int g0/1
ip nat inside
int s0/0/1
ip nat outside
```

### 5.6.2 Dynamic NAT

#### 5.6.2.1 Configuration

```
en
conf t
access-list 1 permit 192.168.1.1 0.0.0.255
ip nat pool public_access 209.169.200.242 209.169.200.254 netmask 255.255.255.224
ip nat inside source list 1 pool public_access
```

### 5.6.3 PAT

```
en
conf t
access-list 1 permit 192.168.1.1 0.0.0.255
ip nat inside source list 1 interface serial 0/0/1 overload
```

### 5.6.4 General

#### 5.6.4.1 Verify Configuration

```
en
show ip nat translations
show ip nat statistics
```

#### 5.6.4.2 Clear Static NAT

```
en
```

```
conf t
no ip nat inside source static 192.168.1.20 209.169.200.225
```

#### **5.6.4.3 Clear Dynamic NAT**

```
en
clear ip nat translation *
clear ip nat statistics
```

#### **5.6.4.4 Remove the public NAT pool**

```
en
conf t
no ip nat pool public_access 209.169.200.225 209.169.200.230 netmask
255.255.255.248
```

#### **5.6.4.5 Remove the NAT translation from inside source list to outside pool**

```
en
conf t
no ip nat inside source list 1 pool public_access overload
```

### **5.7 VPN**

#### **5.7.1 Site to Site VPN**

##### **5.7.1.1 Activate securityk9 module.**

```
en
conf t
license boot module c1900 technology-package securityk9
end
wr
reload
```

#### **5.7.2 Configure IPsec Parameters on R1**

##### **5.7.2.1 ACL**

```
en
conf t
access-list 110 permit ip 192.168.1.0 0.0.0.255 192.168.3.0 0.0.0.255
```

##### **5.7.2.2 ISAKMP Phase 1**

```
en
